EXPERIENCE

Broken Asylum, Canada — CEO/ Founder/ Lead Developer

April 2024 - PRESENT

Broken Asylum is the name of the game / software company that I made and use as a way to improve my coding skills with different languages.

EDUCATION

Rockridge, Canada — computer sciences 11

september 2024 - june 2025

I took this course as a way to improve my skills in programming

PERSONAL PROFILE

For many years now I have been a hard worker who likes to make sure things get done. I have many skills in computer science and math and have enjoyed programming and math. I work well with other people but prefer to do things on my own. I work hard based on my pay and unless it is something I really enjoy I am less inclined to do things above my pay grade.

PROJECTS

I have done many coding projects most of which can be seen on my github portfolio which is currently private. I have also done lots of physical projects such as building a racing drone, building a racing sim, making watches, making a table, making a wooden watch and many more.

SKILLS

Coding: C#, C++, arduino C, Python, Java, Javascript, HTML

Math

Watch repair and building

Designing

3d modeling

Electronic's repair

EXAMPLES

My coding skills and be observed on my website <https://www.brokenasylum.com/>

I have volunteered at countless Fixit fairs on bowen where I try my best to fix whatever broken electronics are brought to me

In my free time I like to do fun projects from designing and building my own racing sim to building and repairing watches

LANGUAGES

English, Some Japanese
